Stanbio Laboratory Receives FDA Approval for HemoPoint® H2 Data Management System

BOERNE, TX – June 23, 2009 – Stanbio Laboratory, L.P., a leader in medical testing and clinical diagnostic devices, is pleased to announce the FDA approval of its **HemoPoint® H2** Hemoglobin Data Management System (DMS). The new, **HemoPoint® H2 DMS** features the timesaving convenience, quality control, and recordkeeping ease of data management technology.

The new **HemoPoint® H2 DMS** now utilizes barcode identification of operators, patients, and control intervals, as well as, connectivity to PCs via Bluetooth®. 4,000 patient and 500 QC results memory also contributes to an increased level of efficiency, while still including all the features that have made the original **HemoPoint® H2** a trusted hemoglobin test system. The improved **HemoPoint® H2 DMS** still includes both a hemoglobin and calculated hematocrit result with one simple test; a proprietary “soft load” cuvette holder designed to minimize contamination of the optics lens; an easy-to-read backlit touch screen display – to name just a few of the instrument’s original features.

These improved features along with the new **HemoPoint® H2 n•x•t** microcuvette, make Stanbio Laboratory’s **HemoPoint® H2 DMS** hemoglobin and hematocrit test system an innovative and effective point-of-care device.

Hemoglobin testing is routinely performed in blood banks, public health clinics, operating theaters, intensive care units and trauma centers. Point-of-care hemoglobin testing is also run by OB/GYNs, as well as, general and pediatric physicians.

Founded in 1960 and headquartered in Boerne, Texas, Stanbio manufactures and sells medical testing and diagnostic devices including clinical chemistry, pregnancy, drugs of abuse, serology, urinalysis, and point-of-care blood hemoglobin tests. Stanbio Laboratory's Quality System is ISO 13485 registered and its facility operates under the USFDA current GMP requirements. Stanbio also offers OEM and private labeling capabilities. Currently, Stanbio distributes products in over 110 countries worldwide. This year the company celebrates its 49th year in business.
